

**IAEA TC Project RER/0/035**  
**“Supporting Enhanced Sustainability of Programme Activities”**

**Regional Workshop on Sustainable Energy Development**

**Prague, Czech Republic**

**4-5 July 2014**

In order to make the best out of the time available, all participants should attend the regional meeting with a set of slides (8-10 slides suggested), which shall serve as support for the presentation of their respective experiences.

***Oral Presentation Length:***

It is strongly encouraged that presentations last no more than 10 minutes to allow for about 5 minutes of follow-on discussion and to entertain questions from the audience.

***Suggested Presentation Structure***

It is advised that presentations (preferably in Power Point format) make use of a “bullet point” style. Presentations content should be mainly focused on experiences of presenter organization/ institution related to the workshop topics.

In Particular, presentations by **Member States** should possibly comprise:

1. A brief overview of current and perspective national energy strategies, with emphasis on the role of the nuclear option vis-à-vis other energy sources.
2. A summary of of key factors leading/ which have led to the development of current and perspective energy-mix strategies.
3. Suggestions for remaining challenges and emerging areas of interest within the scope of nuclear energy systems and technologies.
