

Regional School of Radiation Emergency Management

Hosted by

The Government of the Russian Federation

through the

Rosatom Technical Academy

St. Petersburg, Russian Federation

24 August to 11 September 2020

Ref. No.: TN-RER9151-2002554

Information Sheet

Purpose

The purpose of the event is to support participants in the development and management of sustainable emergency preparedness and response (EPR) programmes, based on the IAEA safety standards, technical guidelines, EPR tools and training materials.

Working Language(s)

The working language(s) of the event will be **English**.

Deadline for Nominations

Nominations received after **18 May 2020** will not be considered.

Expected Outputs

By the end of the school, it is expected that participants will have a comprehensive understanding of the nuclear and radiological EPR framework and will be able to facilitate the effective implementation and coordination of sustainable EPR programmes in their own countries.

Scope and Nature

The school has a modular structure based on the IAEA Safety Standards Series. The content will be delivered through modules on various theoretical and practical subjects, presenting specific aspects that are best considered separately. This structure makes it possible to highlight some significant elements of an EPR programme through lectures, drills, exercises and visit to different facilities. Some of the topics considered in the training are: the emergency management system; roles and responsibilities in emergency preparedness and response; hazard assessment; protection strategy for a nuclear or radiological emergency; identifying and notifying a nuclear or radiological emergency and activating an emergency response; taking mitigatory actions; taking urgent protective actions and other response actions; providing instructions, warnings and relevant information to the public for emergency preparedness and response; protecting emergency workers and helpers in an emergency; managing the medical response in a nuclear or radiological emergency; communicating with the public throughout a nuclear or radiological emergency; taking early protective actions and other response actions; managing radioactive waste in a nuclear or radiological emergency; mitigating non-radiological consequences of a nuclear or radiological emergency and of an emergency response; requesting, providing and receiving international assistance for emergency preparedness and response; terminating a nuclear or radiological emergency; analysing the nuclear or radiological emergency and the emergency response among other topics.

Participation

The event is open to 25 participants from Member States of TC regional project RER9151. The target audience is qualified professionals from organizations that are responsible and accountable for the management and coordination of nuclear and radiological EPR arrangements. The Members States are encouraged to nominate up to two (2) qualified candidates, in order of priorities, that will be considered in the IAEA standard selection process.

Participants' Qualifications and Experience

The candidates are expected to hold a university degree in emergency management, radiation protection or a related field, and/or have at least five years of relevant experience in preparedness and response to radiation emergencies. Junior professionals familiar with EPR in general and with their respective organizations' emergency management systems are also encouraged to apply for this school.

Occupational Exposure to Radiation

This event may involve occupational exposure to radiation. Therefore, candidates are required to duly complete and return the Occupational Exposure History (OEH) form upon applying for the event. The IAEA will provide selected participants in due course with a dosimeter to monitor their occupational exposure during this event.

Application Procedure

Candidates wishing to apply for this event should follow the steps below:

1. Access the InTouch+ home page (<https://intouchplus.iaea.org>) using the candidate's existing Nucleus username and password. If the candidate is not a registered Nucleus user, she/he must create a Nucleus account (<https://websso.iaea.org/IM/UserRegistrationPage.aspx>) before proceeding with the event application process below.
2. On the InTouch + platform, the candidate must:
 - a. Finalize or update her/his personal details, provide sufficient information to establish the required qualifications regarding education, language skills and work experience ('Profile' tab) and upload relevant supporting documents;
 - b. Search for the relevant technical cooperation event (EVT2002554) under the 'My Eligible Events' tab, answer the mandatory questions and lastly submit the application to the required authority.

NOTE: Completed applications need to be approved by the relevant national authority, i.e. the National Liaison Office, and submitted to the IAEA through the established official channels by the provided designation deadline.

For additional support on how to apply for an event, please refer to the [InTouch+ Help page](#). Any issues or queries related to InTouch+ can be addressed to InTouchPlus.Contact-Point@iaea.org.

Should online application submission not be possible, candidates may download the nomination form for the training course from the [IAEA website](#).

NOTE: A medical certificate signed by a registered medical practitioner dated not more than four months prior to starting date of the event must be submitted by candidates when applying for a) events with a duration exceeding one month, and/or b) all candidates over the age of 65 regardless of the event duration.

Administrative and Financial Arrangements

Nominating authorities will be informed in due course of the names of the candidates who have been selected, and will at that time be informed of the procedure to be followed with regard to administrative and financial matters.

Selected participants will receive an allowance from the IAEA sufficient to cover their costs of lodging, daily subsistence and miscellaneous expenses. They will also receive either a round-trip air ticket based on the most direct and economical route between the airport nearest their residence and the airport nearest the duty station through the IAEA's travel agency American Express, or a travel grant, or they will be reimbursed travel by car/bus/train in accordance with IAEA rules for non-staff travel.

Disclaimer of Liability

The organizers of the event do not accept liability for the payment of any cost or compensation that may arise from damage to or loss of personal property, or from illness, injury, disability or death of a participant while he/she is travelling to and from or attending the course, and it is clearly understood that each Government, in approving his/her participation, undertakes responsibility for such coverage. Governments would be well advised to take out insurance against these risks.

Note for female participants

Any woman engaged by the IAEA for work or training should notify the IAEA on becoming aware that she is pregnant.

The Board of Governors of the IAEA approved new International Basic Safety Standards for Protection against Ionizing Radiation and for the Safety of Radiation Sources. The Standards deal specifically with the occupational exposure conditions of female workers by requiring, inter alia, that a female worker should, on becoming aware that she is pregnant, notify her employer in order that her working conditions may be modified, if necessary. This notification shall not be considered a reason to exclude her from work; however, her working conditions, with respect to occupational exposure shall be adapted with a view to ensuring that her embryo or foetus be afforded the same broad level of protection as required for members of the public.
