<b>Event number</b>	<b>SP-RER6037-2102151</b>
<b>Event title</b>	Virtual ESMIT Course on Oncology Prostate Cancer 2021
<b>Place/Date</b>	<b>Vienna</b>
<b>Nomination Deadline</b>	<b>20 August 2021</b>
<b>Information</b>	This course will focus on advanced prostate cancer including a discussion on the role of PET imaging to select patients to the most personalized treatment. Both considering patients non-metastatic at conventional imaging but positive in new generation imaging (for example PSMA PET), and patients positive at PSMA and eligible for PSMA radio-ligand therapy with beta and alpha particles. In this specific setting, also the criteria to recruit patients who most likely will achieve a good response at RLT will be discussed.

	<p>The course will be 30% theoretical and 70% practical with clinical cases and hands-on sessions.</p>
