

Regional Training Course on Basic Quality Control and Dosimetry in Diagnostic Radiology

Hosted by

The Government of Uzbekistan

through the

Tashkent Institute of Postgraduate Medical Education

Tashkent, Uzbekistan

30 October to 3 November 2023

Ref. No.: TN-RER6042-2303134

Information Sheet

Purpose

The purpose of the event is to train participants on basic concept of dosimetry and quality control applied to diagnostic radiology.

Working Language(s)

The working language(s) of the event will be Russian.

Deadline for Nominations

Nominations received after 14 August 2023 will not be considered.

Project Background

A successful implementation of the International Basic Safety Standards GSR Part 3 requirements related to medical uses of ionising radiation is a significant challenge. A review of the available data revealed many gaps related to the implementation of the GSR Part 3 requirements related to medical uses of ionising radiation. In spite of heterogenous nature of these gaps due to different healthcare and development levels, the overarching problem for all member states was lack of medical physicists in the field of diagnostic radiology. Development of new technology in diagnostic and interventional radiology is posing a higher demand on the medical physics profession, which is expected to have a major role in quality management system, through enhancement of quality assurance and quality control practices.

The project RER6042, based on results and achievements of previous regional projects, has the main objective to improve quality and safety in diagnostic and interventional radiology in the region by building the capacity of medical physicists through increased knowledge, skills and competences.

The need for training in Russian language on these topics has been previously identified. This course will aim to transfer the current knowledge and good practices to relevant professionals in the sub-region.

Scope and Nature

The regional training course will consist of lectures relevant to basic physics and quality control in X ray imaging modalities, followed by practical exercises in hospitals and classroom discussions.

Participation

The meeting is open to 25 participants from TCEU Member States participating in the projects: RER6042 “Building Capacities of Medical Physicists in Diagnostic Radiology to Support the Establishment of Quality Management Systems”.

Each country is invited to nominate two participants who must match the profile described in the corresponding paragraph, indicating the order of priority.

Participants' Qualifications and Experience

Noting that the scope of the project is related to diagnostic radiology medical physics, and in line with the requirements of the International Basic Safety Standards, the participant should be a clinically qualified medical physicist currently working, or having been recruited to work, in a diagnostic radiology department or providing medical physics service to diagnostic radiology departments. In case of lack of an appropriate candidate, and based on proper justification, a medical physicist working in radiotherapy or nuclear medicine, involved in diagnostic radiology related activities may be considered. This course is not intended for participants working for regulatory authorities or as inspectors or for radiographers.

As the event will be conducted in Russian, participants should have sufficient proficiency to follow lectures and express themselves in this language without difficulty.

Application Procedure

Candidates wishing to apply for this event should follow the steps below:

1. Access the InTouch+ home page (<https://intouchplus.iaea.org>) using the candidate's existing Nucleus username and password. If the candidate is not a registered Nucleus user, she/he must create a Nucleus account (<https://websso.iaea.org/IM/UserRegistrationPage.aspx>) before proceeding with the event application process below.
2. On the InTouch + platform, the candidate must:
 - a. Finalize or update her/his personal details, provide sufficient information to establish the required qualifications regarding education, language skills and work experience ('Profile' tab) and upload relevant supporting documents;
 - b. Download and complete the [Designation of Beneficiary and Emergency Contact Form](#), and upload to InTouch+ ('Profile' tab under the personal section) specifying the document name. If already provided, kindly discard this step; and
 - c. Search for the relevant technical cooperation event (EVT2303134) under the 'My Eligible Events' tab, answer the mandatory questions and lastly submit the application to the required authority.

NOTE: Completed applications need to be approved by the relevant national authority, i.e. the National Liaison Office, and submitted to the IAEA through the established official channels by the provided designation deadline.

For additional support on how to apply for an event, please refer to the [InTouch+ Help page](#). Any issues or queries related to InTouch+ can be addressed to InTouchPlus.Contact-Point@iaea.org.

Should online application submission not be possible, candidates may download the nomination form for the training course from the [IAEA website](#).

NOTE: A medical certificate signed by a registered medical practitioner dated not more than four months prior to starting date of the event must be submitted by candidates when applying for a) events

with a duration exceeding one month, and/or b) all candidates over the age of 65 regardless of the event duration.

Administrative and Financial Arrangements

Nominating authorities will be informed in due course of the names of the candidates who have been selected, and will at that time be informed of the procedure to be followed with regard to administrative and financial matters.

Selected participants will receive an allowance from the IAEA sufficient to cover their costs of lodging, daily subsistence and miscellaneous expenses. They will also receive either a round-trip air ticket based on the most direct and economical route between the airport nearest their residence and the airport nearest the duty station through the IAEA's travel agency AX Travel Management, or a travel allowance, or they will be reimbursed travel by car/bus/train in accordance with IAEA rules for non-staff travel.

Disclaimer of Liability

The organizers of the event do not accept liability for the payment of any cost or compensation that may arise from damage to or loss of personal property, or from illness, injury, disability or death of a participant while he/she is travelling to and from or attending the course, and it is clearly understood that each Government, in approving his/her participation, undertakes responsibility for such coverage. Governments would be well advised to take out insurance against these risks.

Note for female participants

Any woman engaged by the IAEA for work or training should notify the IAEA on becoming aware that she is pregnant.

The Board of Governors of the IAEA approved new International Basic Safety Standards for Protection against Ionizing Radiation and for the Safety of Radiation Sources. The Standards deal specifically with the occupational exposure conditions of female workers by requiring, inter alia, that a female worker should, on becoming aware that she is pregnant, notify her employer in order that her working conditions may be modified, if necessary. This notification shall not be considered a reason to exclude her from work; however, her working conditions, with respect to occupational exposure shall be adapted with a view to ensuring that her embryo or foetus be afforded the same broad level of protection as required for members of the public.
